

United Technologies Corporation

Site location: France
 Implementation type: MES (discrete)
 Statim users: 55
 Customer web site: <http://www.utc.com>

United Technologies Corporation (UTC) is a diversified company whose products include Carrier heating and air conditioning, Hamilton Sundstrand aerospace systems and industrial products, OTIS elevators and escalators, Pratt & Whitney aircraft engines, Sikorsky helicopters, UTC Fire & Security systems and UTC Power fuel cells.

--> Business Situation

- Lack of assembly reliability
- Paper based data collection
- Manual data entry to Baan

--> Solution

Statim®

- On-line data validation
- Conforms to UTC software security policy
- Mobile RF terminals integration
- Integration with Baan
- 24 x 7 availability (works with or without ERP connection)
- Delivers superior performance
- Simplifies complex work processes

Statim® Manufacturing Module

- Detailed labor reporting
- Assembly production control
- Order completion declaration

Statim® Alert Management

- Pro-active system administration
- Automatic e-mail notifications of system events occurrences

Statim® Baan Connector

- On-line and automatic integration with Baan
- Utilizing Baan Tools Exchange

--> Benefits

- Production data collection to analyze production line restocking time.
- Higher productivity levels
- Improved data accuracy

--> Implementation

Solution was successfully implemented by V-Ingenierie (<http://www.v-ingenierie.fr/>).
